

Horticultural Crops Research Twilight Tour

Wednesday August 10th
7:00–9:00 p.m.

Please join us to view and discuss current research activities at the Purdue University Horticulture Crops Research Farm. Topics will include:

- high-tunnel vegetable and flower production
- cover crop management in organic vegetable systems
- mating disrupters for insect management
- opportunities and challenges for grapes, apples, and paw-paws
- heirloom tomato variety trial
- organic vegetable breeding

In addition to learning about our current projects, this event will give you an opportunity to provide critical input into future research needs for horticultural crops in Indiana.

Directions: From Lafayette, head south on US-231 for approximately 8.7 miles. Turn left on E County Road 800 South. After one mile, turn right on S County Road 100 East. Meig's research farm is on the left after about 0.5 mile.
