

Herbaceous Perennials for Sun: Identification, Culture and Garden Attributes

A New Online Program for Master Gardeners, Landscapers, and Horticulturists

Herbaceous Perennials for Sun is an innovative, interactive online program developed with Allan Armitage, one of the world's foremost gardening experts on perennials for all growing zones. The program features in-depth information for more than 100 outstanding herbaceous perennials belonging to 24 genera that prefer more than 6 hours of sunlight a day. It teaches you how to make informed decisions that will help you design, select and grow sun-loving perennials in your garden.

An interactive, online program teaches you to identify the plant family, genus, species, variety and cultivar. You will also learn how to identify growing conditions and propagation types as well as interesting facts about each plant, its history and more. Participants' complete online learning activities that help you practice what you learn and then apply it in your own gardens.

Print and electronic resources support learning objectives. Armitage's excellent reference book, *Herbaceous Perennial Plants: A Treatise on Their Identification, Culture, and Garden Attributes (2nd Edition)* is required (and included in registration) for participating in the program and is a wonderful addition to any gardener's library. Several of Armitage's other resources, including an online plant reference database, are suggested for purchase through our Web site, but they are not required for completing the program.

Once you've completed the *Herbaceous Perennials for Sun*, we encourage you sign up for the *Herbaceous Perennials for Shade* because almost everyone's garden has sunny and shady areas that are ideal for planting. The program teaches you about nearly 100 of the most desirable herbaceous perennials belonging to 20 genera that can tolerate or require partial shade to thrive and produce beautiful plants and flowers.

Summary of Herbaceous Perennials for Sun Online Program

The program fee is \$135.00. The following benefits are included:

- *Herbaceous Perennial Plants: A Treatise on their Identification, Culture, and Garden Attributes*, 2nd Ed. by Allan M. Armitage (1141 pages)
- Access to the interactive, online program until September 15, 2006.
- Access to a community of gardeners and gardening experts through the Gardening Institute's online discussion board.
- One-year subscription to the AHS' magazine, *The American Gardener*.
- One-year AHS membership.
- Horticulture Gardening Institute's bi-monthly electronic newsletter.
- Purdue Master Gardeners will receive 20 educational hours for completion of program.

Herbaceous Perennials for Shade Online Program will be available beginning September 30, 2006.

Register now for both programs and save --only \$195 for both!
